

About Us.

Based in northern Virginia, we provide our Data Center, Enterprise and Carrier customers with the following infrastructure and connectivity capabilities that allow agile and efficient expansion of networks in key markets:

- Bandwidth infrastructure and custom network solutions.
- Dark fiber networks connecting key locations.
- Advanced fiber optic cable within conduits operated and maintained by Summit IG.

SummitIG implements innovative, scalable and cost effective connectivity solutions. We are able to do this by leveraging existing underground network infrastructure and augmenting new construction.

What We Do

Dark Fiber

Our dark fiber solution offers customers with a fast, easy and cost effective approach for expanding their network and growing their business. Dark Fiber provides the ability to quickly and affordably scale up a network while maintaining control. Because it is very flexible, SummitIG's dark fiber network can be customized to deliver unique network routes.

Data Center Connectivity Solutions

We provide connectivity solutions that extend the network of data centers to carrier neutral facilities. This brings value-add to customers by allowing data center operators to offer their customers space, power and connectivity beyond their own buildings to multiple points along the SummitIG dark fiber network.

Custom Network Solutions

Our team of experts design solutions that meet the individual needs of our customers. Working closely with construction managers, SummitIG delivers expertly tailored networks that offer optimal results and ROI.

"In today's business environment, service and value are paramount. SummitIG goes the extra mile to exceed our customers' expectations."

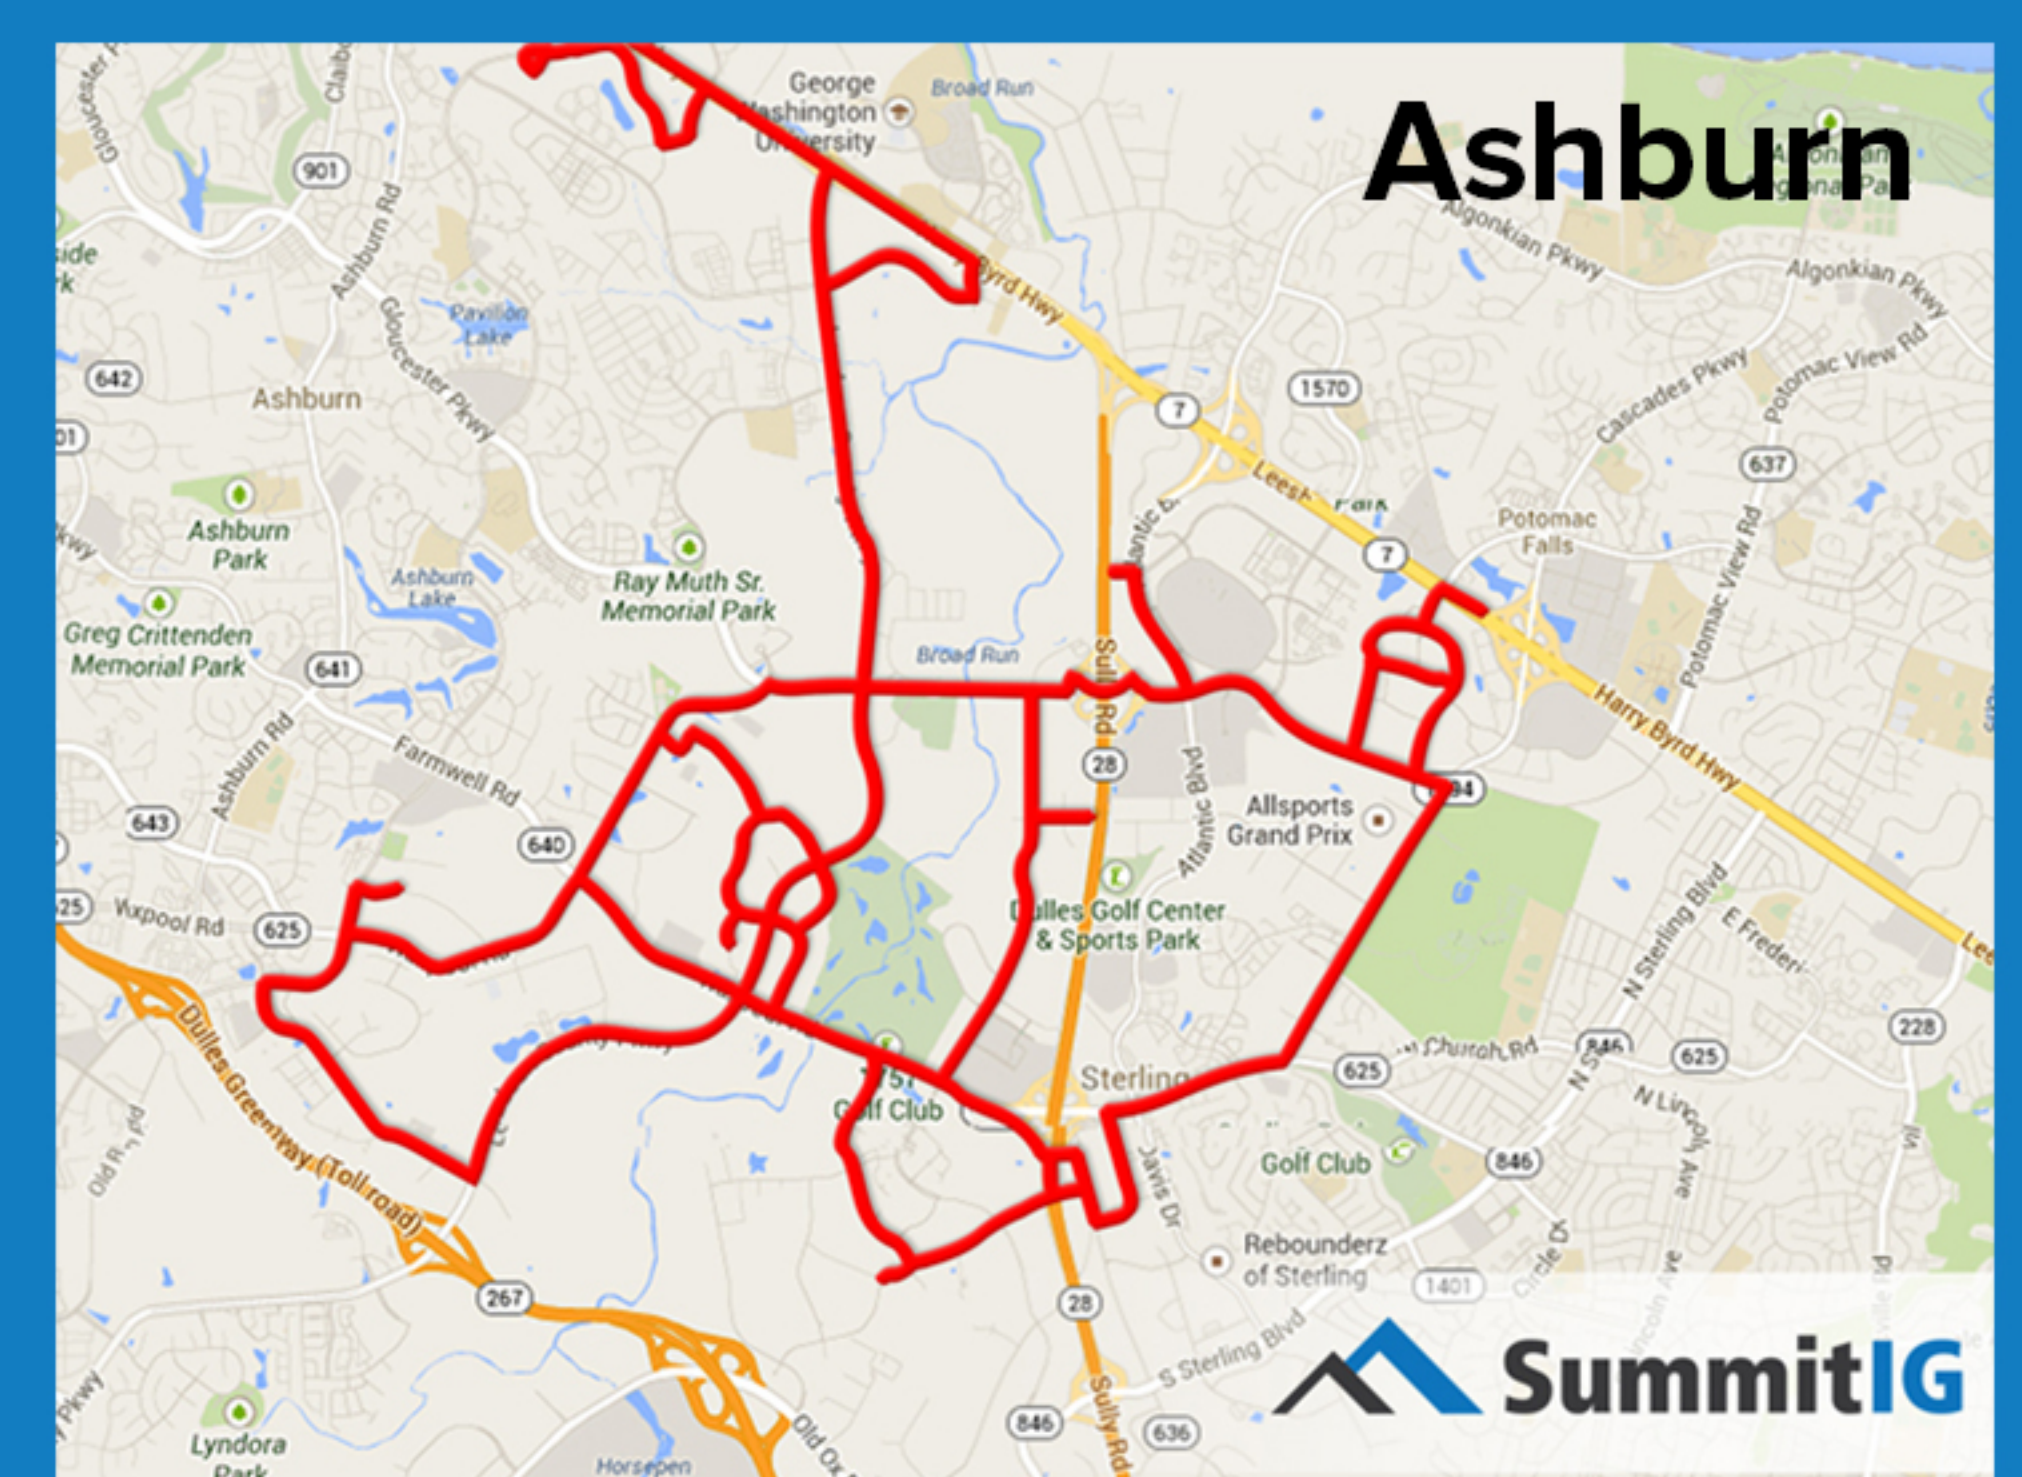

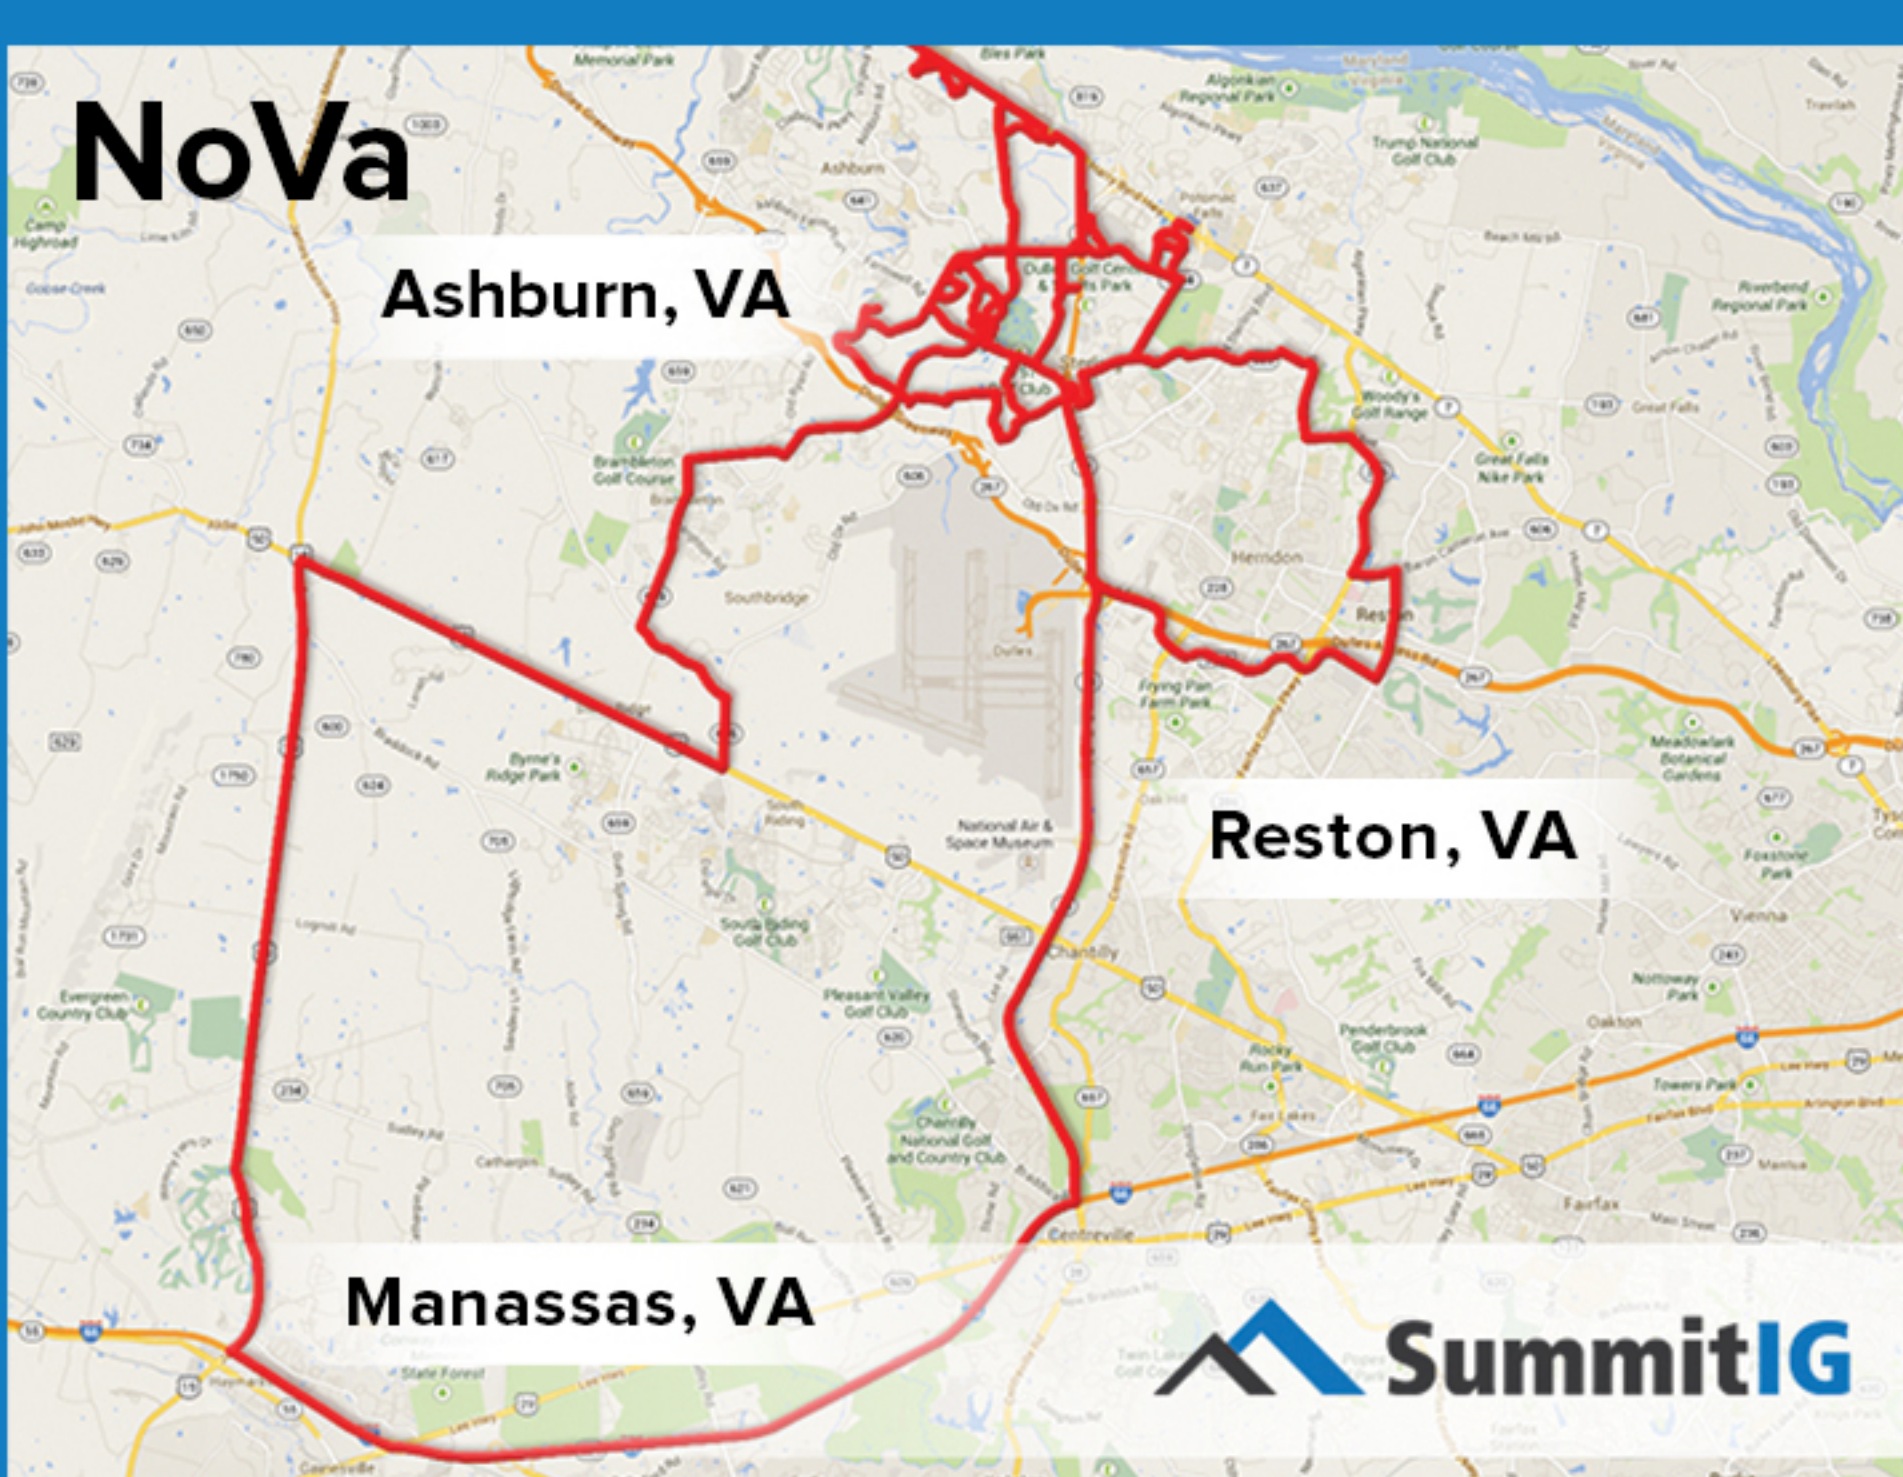

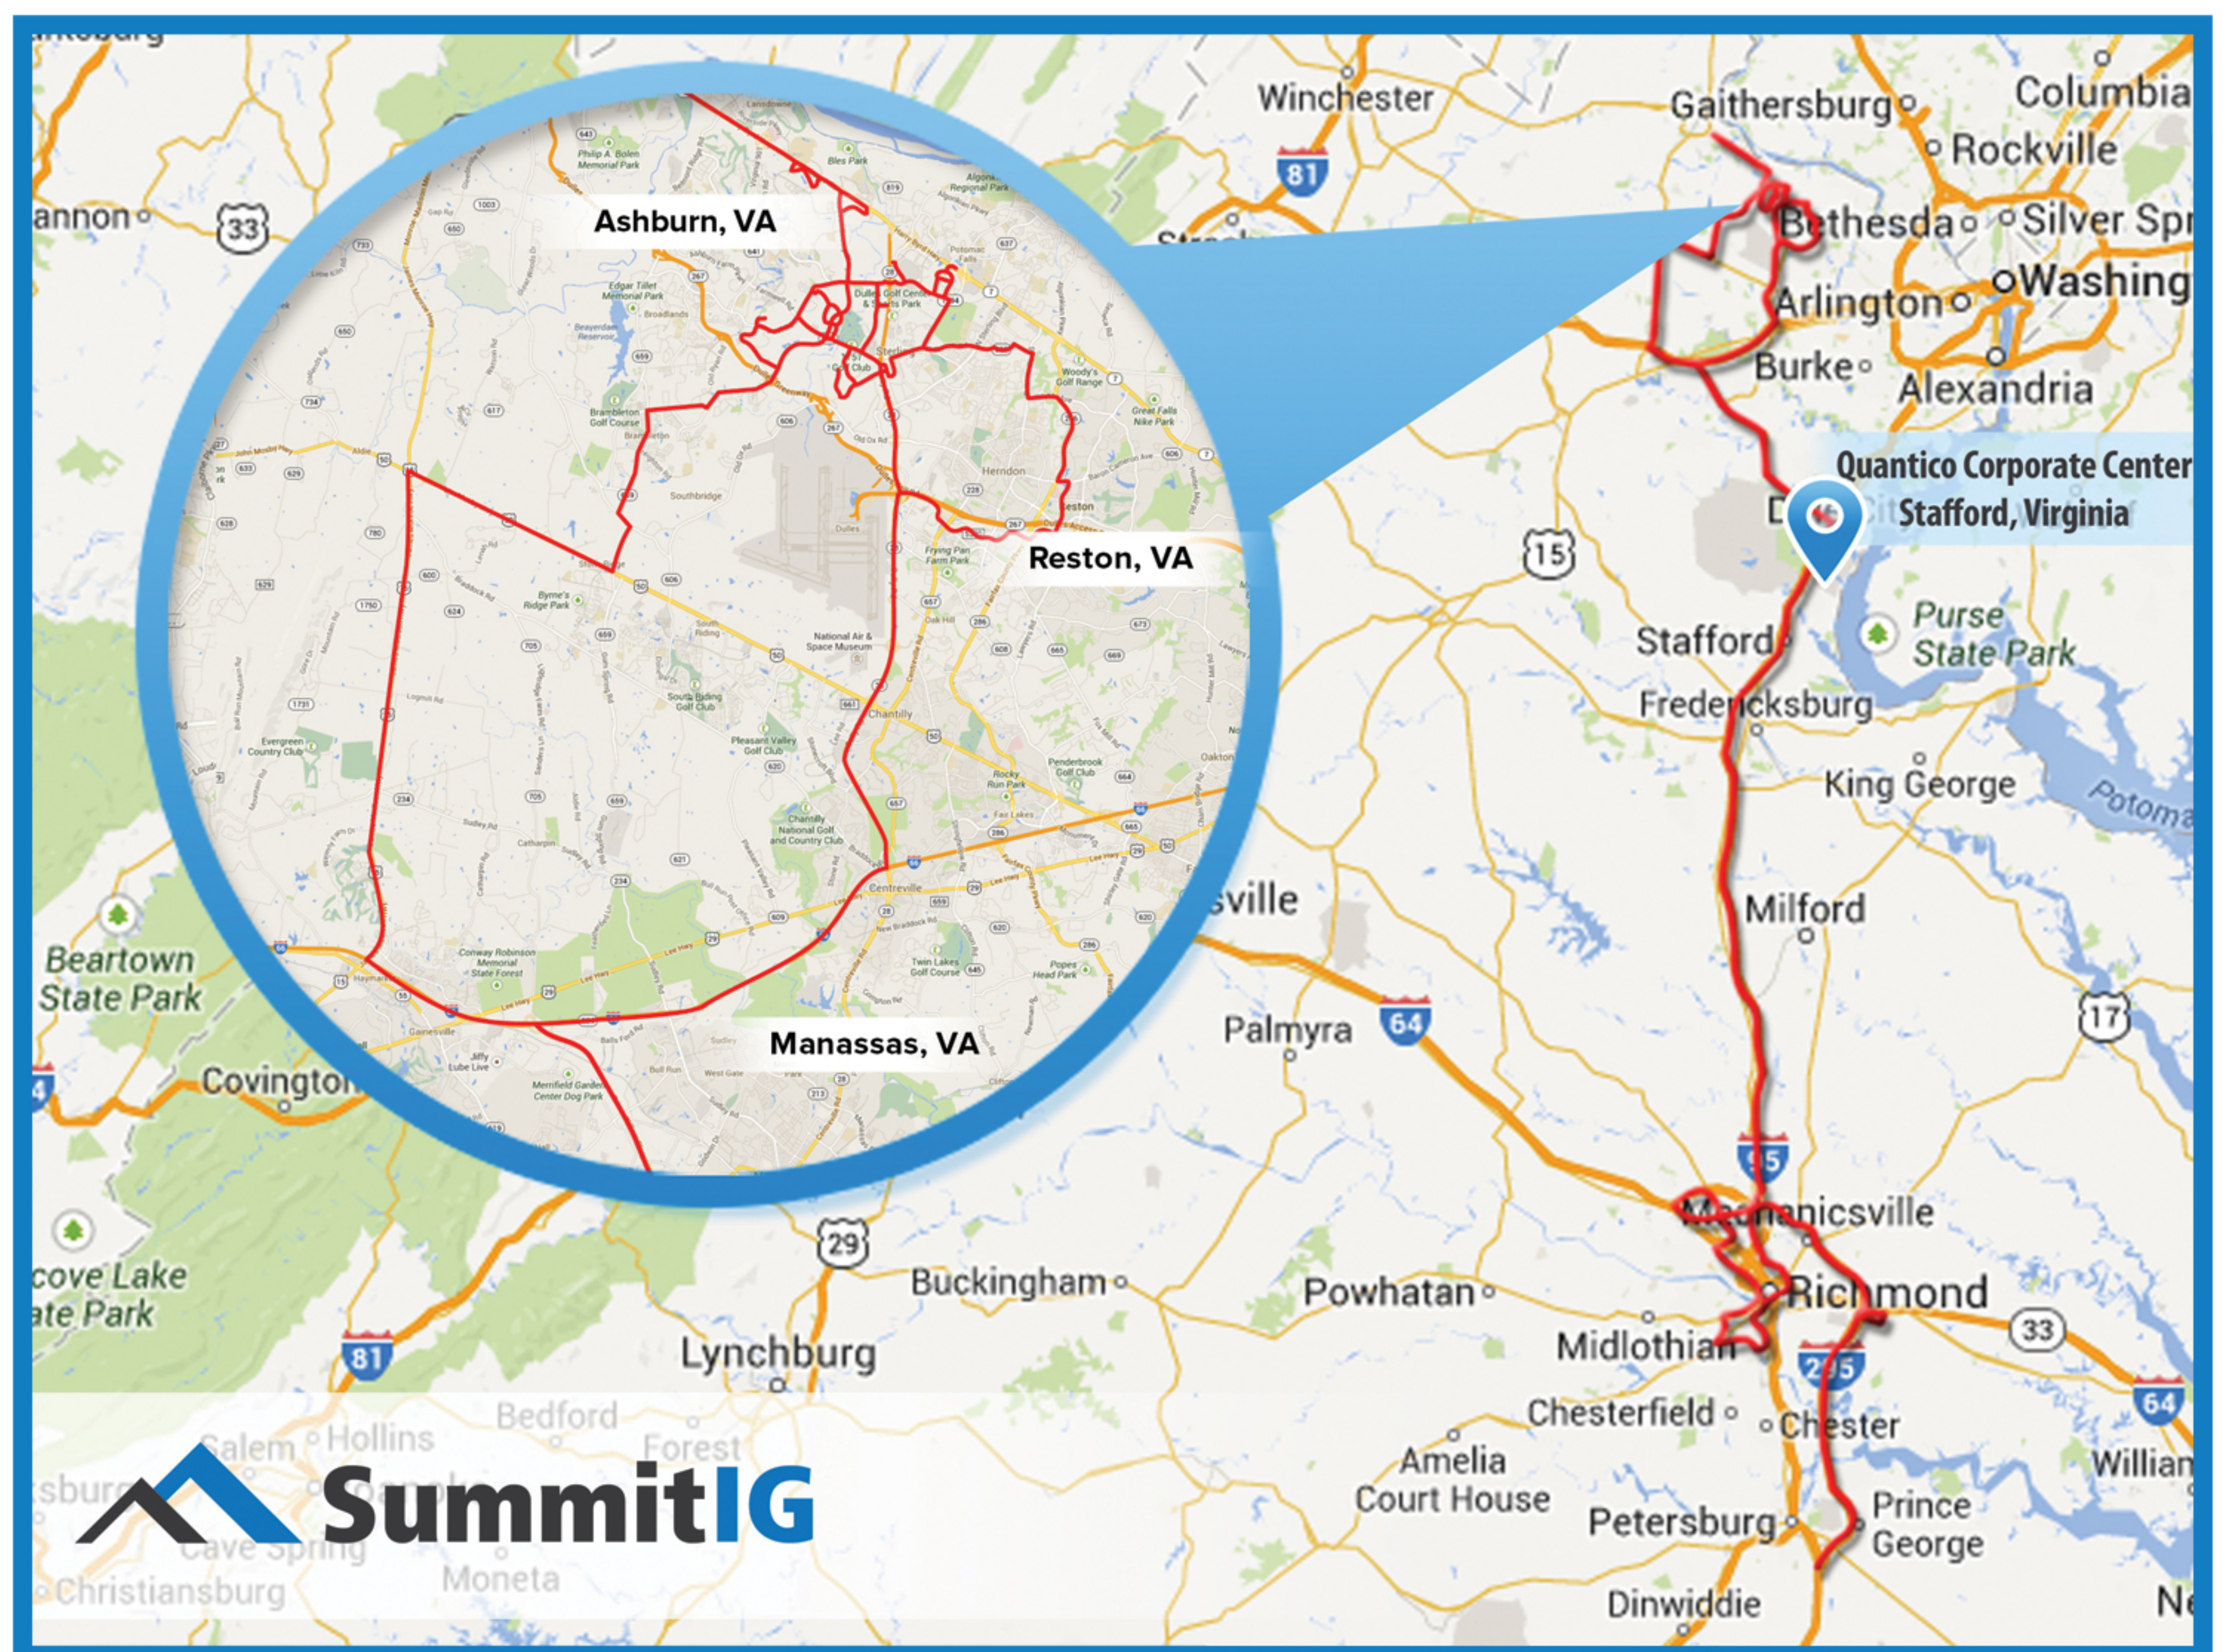

- Bill Cook, CEO

SummitIG provides dark fiber, custom network solutions and data center connectivity that provide flexible, scalable and secure connectivity services.

How We Work

Flexible. Scalable. Secure.

SummitIG can meet your company's connectivity needs. With our robust infrastructure network in northern Virginia combined with network assets in Richmond—along with transport infrastructure between key Virginia markets.

Scale the Summit.
